GLOBAL ENERGY SECURITY AND
REGIONAL ALLIANCES PIVOT AS
IRAN EXERCISES SOVEREIGNTY
OVER THE STRAIT OF HORMUZ
AMID STALLED US MILITARY
AGRESSION

DAY-AT-A-GLANCE

August 6, 2026, marks a pivotal shift in the geopolitical landscape of West Asia, characterized by Iran's transition from a defensive posture to an assertive exercise of sovereignty over the Strait of Hormuz. Following months of conflict, Tehran and Muscat are in the [final stages](#) of a landmark deal to establish a new shipping corridor. This development effectively sidelines US and Israeli efforts to maintain maritime hegemony in the region. The Iranian leadership, now under [Ayatollah Sayyid Mujtaba Khamenei](#), has rejected Washington's calls for negotiations, characterizing them as a "failed strategy" of bullying and deception while maintaining the nation's armed forces on [full alert](#). The day's events suggest that the "era of hit and run" is over, with Iran now dictating the terms of engagement on the battlefield and in diplomatic channels.

The economic consequences of this prolonged conflict are increasingly felt within the United States, where inflation, surging fuel prices, and a [stagnant 1.5% GDP growth](#) are eroding public support for the Trump administration. Social media has become a repository of the administration's [contradictory promises](#), particularly regarding Medicare and military spending. Simultaneously, the "Axis of Resistance" is intensifying its pressure; Yemeni forces have conducted a [large-scale military operation](#) against Saudi-backed mercenaries to break a decade-long blockade, and Hezbollah's base remains defiant despite Israeli efforts to impose a "peace deal" that many Lebanese citizens view as a [betrayal of sovereignty](#).

Technologically, Iran is signaling its move toward "technological sovereignty" by joining the [World Artificial Intelligence Cooperation Organization \(WAICO\)](#), a China-led initiative that excludes Western influence. This move, combined with the domestic development of the [Simorgh supercomputer](#) and advanced AI-integrated weaponry, positions Iran as a rising power in the Global South. The day's broadcasts emphasize a world fracturing into two distinct blocs: a struggling Western alliance led by an "irrelevant" US presidency and a resilient Eastern/Global South coalition centered on sovereignty, indigenous technology, and resistance against "global arrogance."

MAJOR DEVELOPMENTS

Iran-Oman Maritime Agreement and Strait of Hormuz Control

- Negotiations are in the [final review and drafting stage](#) for a new maritime management regime between Iran and Oman.

- The deal includes the potential for [transit fees of 5% to 7%](#) on cargo values, which could generate \$45 billion annually for Tehran.
- Iranian officials emphasize that the Strait [will remain closed](#) to hostile vessels from the US, Israel, and their allies until regional aggressions cease.

Escalation of the Yemen Front

- Ansarullah forces launched a massive preemptive strike using [ballistic missiles and drones](#) against Saudi military mobilizations in Al-Ruwaik and Al-Abr.
- Yemen has implemented a "blockade for blockade" policy, targeting Saudi tankers like the [Daisy and Wafa](#) to retaliate for the closure of Sana'a International Airport.
- Yemeni health officials warn the air blockade is a ["deliberate death sentence"](#) for millions, with pharmaceutical supplies depleted by 200% price increases.

US Domestic and Economic Crisis

- Public support for the war against Iran has [steadily eroded](#), even among Trump's MAGA supporters.
- New Mexico has [sued the Department of Justice](#) for access to unredacted Jeffrey Epstein files, alleging federal "stonewalling."
- Internal military reports reveal that [nearly 700 US service members](#) have suffered traumatic brain injuries (TBI) from Iranian missile and drone strikes.

Israeli Regional Aggression and Internal Friction

- Israeli forces are conducting a [large-scale raid on the Qalandia refugee camp](#), searching homes and arresting dozens of Palestinians.
- Internal disputes between Israeli Defense Minister Israel Katz and military leadership have gone public, with Katz [criticizing the Chief of Staff](#) on live television.
- Human rights monitors allege Israel is removing rubble in Gaza to ["erase war crime scenes"](#) before international investigators can arrive.

KEY GOVERNANCE TOPICS

Armed Conflict & Militarization

- Iran has shifted its military doctrine from defensive to ["strategic surprise" and preemptive strikes](#).
- Advanced analysis of the [Fattah hypersonic missiles](#) indicates they use maneuverable warheads that render US Aegis and THAAD systems obsolete.
- The US Space and Central Command in Jordan [suffered surprise attacks](#) that stunned decision-makers in Washington.

Tech Sovereignty & AI

- Iran's membership in WAICO is framed as an entry into a [global governance structure](#) independent of Western influence.
- Tehran is integrating AI into its [asymmetric warfare units](#), specifically drones and missiles, to counter traditional military superiority.

Energy & Critical Minerals

- Oil prices have surpassed [\\$100 per barrel](#) due to disruptions in the Strait of Hormuz, with some analysts predicting a surge to \$200.
- The closure of the Strait has forced Saudi Arabia to [reroute oil through pipelines](#) to Yanbu, which Ansarullah has now identified as a target.

Macroeconomics & Trade

- Iran claims [90% food self-sufficiency](#) despite heavy sanctions, contrasting itself with wealthier regional neighbors that import 98% of their food.
- Pakistan and Iran have reaffirmed a commitment to increase [annual bilateral trade to \\$10 billion](#).

DEEP DIVE: TRENDS AND THEMES

The Fracture of Western Hegemony

A recurring theme is the portrayal of the US as a "paper tiger"—murderous but [militarily crippled](#). The broadcast highlights the US's inability to sustain a large-scale conflict due to depleted [interceptor missile stockpiles](#) (requiring three years to replenish) and rising domestic instability. The failure of the "maximum pressure" campaign is cited as evidence that Iran has successfully "de-linked" from the Western-led financial and security architecture. The US is seen as desperate to draw allies into a conflict they have [refused to join](#), with European partners reportedly balking at further military expansion until a ceasefire is reached.

The Rise of the "Global South" Alternative

Iran is positioning itself at the [intersection of major trade routes](#), such as the International North-South Transport Corridor (INSTC), making it an "unavoidable node" for Russia, China, and India. This shift is accompanied by a new ideological alignment, where organizations like WAICO, BRICS, and the SCO are presented as [just alternatives](#) to Western institutions. This "bloc politics" theme suggests that the Global South is no longer seeking integration into the Western order but is building a parallel, sovereign ecosystem.

Martyrdom as a Strategic Asset

The broadcasts elevate the concept of ["the victory of blood over the sword."](#) The martyrdom of high-level figures like Ali Khamenei and Sayyid Hassan Nasrallah is not framed as a loss but as a unifying force that [revitalizes the resistance](#). The funeral of Ali Khamenei, estimated at [10 million attendees in Iraq alone](#), is used to demonstrate the "deep emotional relationship" and "axis of solidarity" that transcends national borders, complicating any Western attempts at "regime change" or psychological operations.

INTERNAL DYNAMICS & DOMESTIC INSTABILITY

United States: Institutional Decay and Economic Anxiety

The US is portrayed as a nation in crisis, with 60% of citizens living [paycheck to paycheck](#) and over 750,000 homeless. The broadcast emphasizes a growing rift between the "ruling class"—which prioritizes "endless wars" and [crypto-corruption](#)—and ordinary taxpayers. The "MAGA" base is shown to be [turning against Trump](#) as economic promises remain unfulfilled and basic services like daycare are

dismissed as "state issues" while billions are sent to Israel.

Iran: Transition and Resilience

Iran is depicted as a nation [united by external threats](#). The transition to Ayatollah Sayyid Mujtaba Khamenei is described as seamless, with President Pezeshkian praising his ["exceptional" ethics and humility](#). The government claims to have managed the country under "the most difficult conditions since the revolution," relying on "people's solidarity" to prevent social collapse despite [missile strikes and energy imbalances](#).

Israel: Political Survival and Civil-Military Rifts

Israel faces significant internal tension, though some analysts argue Netanyahu maintains 80% support for the war [among the Zionist population](#). However, the public [rebellion of military generals](#) against the Security Minister suggests a breakdown in institutional coordination. The government is accused of engaging in "blood for elections," using military incursions into refugee camps to [appease far-right voters](#) ahead of the next ballot.

EXTERNAL DYNAMICS & GLOBAL POSTURE

The Failure of "Bringsmanship"

The international system is framed as moving toward a multipolar reality where US "bringsmanship" strategies have failed. Trump's threats to "unleash military power not seen since WWII" were [abruptly reversed](#), which Tehran interprets as a realization of Western military exhaustion. The "outside world" is no longer a zone for US power projection but an arena where Iran, Oman,

and China [streamline navigation](#) and establish new "maritime orders" on their own terms.

THE ECONOMIC ENVIRONMENT

The global economic environment is in a state of "attritional war," with the US suffering from policy-driven shocks and high tariffs. The Strait of Hormuz closure remains the primary driver of market volatility.

Key Economic Vectors:

- **Commodities:** Oil prices fluctuating [above \\$100/barrel](#); potential for \$200 if Red Sea routes are also fully blocked [by Ansarullah](#).
- **US Indicators:** GDP growth at [1.5%](#); unemployment at 4.2% but "camouflaged" by a [shrinking labor force](#); gas prices hitting \$8/gallon in some states [like California](#).
- **Trade Agreements:** Pakistan and Iran signing [MoUs on joint industrial zones](#) and a gas pipeline to reduce electricity costs in Pakistan.
- **Corporate/Market:** South Korea's stock market [plunging \\$2.18 trillion](#) as the AI bubble "fades"; BP quarterly profits up 50%, fueling [war profiteering](#) allegations.
- **Financial Misconduct:** Allegations that Donald Trump Jr. and the "World Liberty Financial" crypto venture [scammed 1 million Americans](#) of \$3.8 billion.

LEADERSHIP CHANGES

The transition in Iran and personnel shifts in the US legal/military apparatus are central to the day's strategic narratives.

- **Ayatollah Sayyid Mujtaba Khamenei:** Confirmed as the [new Leader of the Islamic Revolution](#) following the assembly of experts meeting in Qom, which occurred despite a Zionist [attempt to destroy the building](#).
- **Todd Blanche:** Serving as [Acting Attorney General](#) of the United States; currently being sued by the state of New Mexico over Epstein files.
- **General Majid Ibn Riza:** Iran's [Acting Defense Minister](#), overseeing the modernization of "indigenous military technology."
- **Israel Katz:** Minister of Military Affairs, reportedly [restrained by the US](#) from attacking Iranian energy infrastructure, creating friction with Netanyahu.

EDITORIAL POSTURE & STORY HIERARCHY

Lead Stories: The broadcast prioritizes the [readiness of Iranian forces](#), the [Yemeni military operation](#), and the [Strait of Hormuz negotiations](#). There is an heavy emphasis on "human stories" from the "third imposed war," such as the [death of eight-year-old Avina Amir Khashani](#) in a refinery strike, intended to evoke emotional response and moral outrage. The Hiroshima anniversary is used as a [historical framing device](#) to portray the US as the world's only unpunished nuclear aggressor.

Buried Stories: The "Rome talks" for a Lebanese peace deal are mentioned as ["called](#)

[off"](#) due to a building explosion, but are largely dismissed as irrelevant compared to the narrative of resistance. The ongoing [Gaza ceasefire violations](#) are reported but overshadowed by the regional expansion of the conflict.

Conspicuous Omissions: There is almost no mention of internal dissent in Iran or economic hardships within the Islamic Republic, which are instead framed as "enemy plots" that [failed to dissatisfy the people](#). The specific nature of the "Ramazan war" casualties is kept vague, and there is no discussion of the political costs to the Iranian leadership from the ongoing conflict.

GEOPOLITICAL FRAMING

The day's framing follows a "Strong East/Weak West" spectrum, where Western leaders are portrayed as deceptive and corrupt while Global South leaders are competent and principled.

COUNTRIES

- **Iran:** Portrayed as a ["misunderstood and underestimated"](#) civilization that is "grappling the US by the neck" economically [through the Strait](#).
- **United States:** Characterized as a ["toothless" bully](#) struggling for survival, with a population ["no longer fearing"](#) its military rhetoric.
- **Oman:** Framed as a ["wise" and "honest" neighbor](#) that is successfully resisting US pressure to jointly manage regional security [with Iran](#).
- **Saudi Arabia:** Depicted as a ["reluctant" but "reckless"](#) aggressor that is paying the price for acting as a US proxy.

LEADERS

- **Donald Trump:** Consistently described as a liar and ["irrelevant"](#) figure who repeats the same [lies "106 times"](#) without impact.
- **Benjamin Netanyahu:** Framed as a ["man wanted by the ICC"](#) who is celebrating while Lebanon "disarms its own defenders."
- **Sayyid Muftaba Khamenei:** Elevated as an ["exceptional" ethical authority](#) and the "guardian" of the Ummah.

NON-STATE & CORPORATE ACTORS

- **Ansarullah:** Described as the ["supporters of God"](#) and the "most courageous fighters of our time."
- **Hezbollah:** Framed as the only force that ["fought Israel to a standstill"](#) and the true protector of Lebanese sovereignty.
- **Euro-Med Human Rights Monitor:** Cited as a [credible witness](#) to Israeli "genocide" and attempts to "erase" evidence.

INFORMATION WARFARE ENVIRONMENT

The meta-narrative of the day is the ["dangerous illusion behind Washington's diplomacy."](#) Tehran is actively seeding the narrative that Trump's talk of negotiations is merely [buying time](#) before a bigger strike, while Iran is "patiently" waiting to "punish any aggressor" [at the proper moment](#). This is a classic counter-psyop designed to project strategic confidence and deter US action.

Simultaneously, the broadcast highlights the use of ["red flags of revenge"](#) and [satellite imagery](#) of pinpointed US bases to communicate a "cost-benefit analysis" to the American public. By documenting the traumatic brain injuries of US troops, the

"Axis of Resistance" is weaponizing the human cost of war to [discourage US military involvement](#). There is also a concerted effort to frame any internal Lebanese or Palestinian political groups seeking peace as ["traitors"](#) or "puppets" of the US-Zionist empire.

HYPOTHESES AND FUTURE OUTLOOK

- **Full Maritime Chokepoint:** If Ansarullah follows through on its [threat to hit Yanbu](#) and the Strait of Hormuz remains restricted, global oil supply will drop by 25%, likely triggering a [1929-style crash](#) in Western markets.
- **Technological Decoupling:** Membership in WAICO suggests a future where Iran's military hardware [integrates Chinese AI standards](#), making Western electronic warfare suites permanently ineffective against Iranian munitions.
- **US Regional Withdrawal:** The reported depletion of [Patriot and THAAD interceptors](#) will likely force a consolidation of US forces into fewer, more defensible hubs, leaving regional allies like Saudi Arabia and Jordan increasingly exposed to Iranian "strategic surprise."

STRATEGIC FORESIGHT

Short Term (1-4 Weeks): Expect a formalized announcement of the [Iran-Oman Strait deal](#), accompanied by the first "service charges" levied on neutral tankers. We may see retaliatory Israeli strikes on [Iranian energy infrastructure](#), potentially ignoring US restraints as internal political pressure on Netanyahu mounts.

Medium Term (1-6 Months): The US midterm elections (Nov 3, 2026) will likely

lead to a [historic Republican defeat](#), potentially paralyzing the Trump administration's ability to fund further regional operations. Ukraine's Caspian Sea [attack on an Iranian vessel](#) suggests the opening of a new Caspian front, possibly facilitated by Western intelligence.

Long Term (1-5 Years): The consolidation of the [INSTC trade artery](#) will shift the center of Eurasian trade from sea to rail, permanently reducing the leverage of the US Navy. Iran's AI production goal [to be a top 10 player by 2032](#) will likely lead to a new arms race in autonomous "loitering drones" across the region.

RISK ASSESSMENT

- **Global Maritime Crisis:** The risk of total closure of the Strait of Hormuz and Bab al-Mandab. **Triggers:** A US/Israeli strike on the [Kharq island oil terminal](#). **Likelihood:** High. **Impact:** Catastrophic global recession and \$200 oil. **Mitigations:** Implementation of the [Islamabad MoU](#) and a verified US naval withdrawal.
- **Regional Nuclear Proliferation:** The threat of nuclear escalation. **Triggers:** Use of [tactical nukes](#) by the White House to break the Strait blockade. **Likelihood:** Low but increasing with "craziness" in leadership. **Impact:** Unprecedented regional destruction. **Mitigations:** Formalization of the "three non-nuclear principles" [as cited by Japan](#).

- **US Domestic Collapse:** Massive civil unrest and "Vietnam-style" protests. **Triggers:** Gas prices [exceeding \\$10/gallon](#) or a 1929-style market crash. **Likelihood:** Moderate-High. **Impact:** Political paralysis of the superpower. **Mitigations:** Drastic cuts in [military spending](#) to fund social safety nets.
- **Saudi Infrastructure Destruction:** Total loss of Saudi oil export capacity. **Triggers:** Ansarullah strike on [desalination plants or Yanbu refineries](#). **Likelihood:** High. **Impact:** Economic ruin for the GCC. **Mitigations:** Immediate lifting of the [blockade on Yemen](#).
- **AI/Cyber Warfare Bubble:** Collapse of Global South high-tech markets. **Triggers:** Sharp correction in [semiconductor hardware](#). **Likelihood:** Moderate. **Impact:** Slowdown of Iran's "Simorgh" processing projects. **Mitigations:** Increased [cooperation via WAICO](#).

GAPS & BLIND SPOTS

- The broadcast claims Iran is 90% food self-sufficient [under sanctions](#), but fails to address chronic water crises [admitted as a challenge](#) by Pezeshkian.
- There is no verified third-party evidence for the [Fattah missile's 1-meter accuracy](#), which may be a strategic exaggeration for deterrence.
- The actual status of the [88 members of the Assembly of Experts](#) after the March 2026 building collapse is unconfirmed by non-Iranian sources.
- The reported [scam by Donald Trump Jr.](#) involving \$3.8 billion is based on "HQ News" reports and lacks details on legal filings or actual victim counts.

CONTRARIAN NARRATIVE SCENARIOS

The "Stalling Strategy" Hypothesis

Iran's patient diplomacy and negotiations with Oman might be a [smoke screen](#) to finalize its domestic nuclear enrichment goals or to await the [production of enough hypersonic warheads](#) to launch a final "knockout blow" against US regional assets. Conversely, Trump's "locked and loaded" rhetoric could be a stall to wait for [three years' worth](#) of interceptor missiles to be produced by a wartime US industrial base.

Black Swan Event: The "Petro-Yuan" Switch

If Iran successfully forces a switch from the Petro-Dollar [to the Petro-Yuan](#) for all Strait of Hormuz transits, it could trigger an instantaneous collapse of the US Treasury market, rendering the 2027 [NDAA \\$1.15 billion military budget](#) worthless and forcing an unplanned, chaotic US withdrawal from the Eastern Hemisphere.

RECOMMENDATIONS & IMPLICATIONS

For Statecraft/Public Sector:

- **Security:** Defense ministries must urgently re-evaluate the viability of THAAD/Aegis systems against [maneuverable kinetic impact warheads](#).
- **Economic:** EU nations should pursue [independent energy deals with Iran](#) to avoid being "collateral damage" in a US-led maritime blockade.

- **Diplomatic:** Regional states must mediate a "**blockade for blockade**" end in Yemen [before Yanbu infrastructure](#) is permanently damaged.

For Private Sector/Investors:

- **Supply Chains:** Reroute all non-essential maritime cargo [around Southern Africa](#) as Bab al-Mandab becomes a "closed military zone."
- **Regulatory:** Prepare for [5-7% "transit fees"](#) in any West Asian shipping models and incorporate these into freight cost insurance.
- **Capital Allocation:** Hedge against a massive US [dollar devaluation](#) and look for opportunities in Global South industrial zones [like the Pakistan-Iran border](#).

LEGISLATIVE ROUNDUP

The day's legal discourse focuses on the institutionalization of US-Israeli coordination and the use of emergency laws for domestic control. The US is also facing legal challenges over [privacy vs. transparency](#) in the Epstein case.

BILLS DISCUSSED/DEBATED:

- **FY 2027 NDAA Section 224:** A provision requiring a dedicated [Pentagon executive agent](#) to coordinate AI, cyber, and quantum war technology development with the Israeli military.
- **Islamabad Memorandum of Understanding:** A 14-point framework [mediated by Pakistan](#) that Tehran demands the US fulfill before the Strait of Hormuz can be reopened.

- **One Big Beautiful Bill Act:** A [Trump-signed act](#) from one year ago that critics say disproportionately grew the net worth of the top 1% by 30%.

HEARINGS & PRESS EVENTS:

- **Yemeni Health Press Conference:** Officials in Sana'a [presented data](#) on 1,600 pharmaceutical items missing from the market due to the blockade.
- **Italian Lower House Briefing:** High school teachers [denounced government scrutiny](#) for teaching about the "Gaza genocide."
- **WAICO Opening Ceremony:** The Chinese President [outlined policies](#) for "AI serving humanity" rather than for "military dominance."

KEY STORIES

- **Strait of Hormuz Finalized Deal:** Iran and Oman reach the [drafting stage](#) of a new shipping management regime to bypass the US naval blockade.
- **Operation "Blockade for Blockade":** Ansarullah strikes the Saudi [tanker Daisy](#) with a ballistic missile in the Gulf of Aden, forcing it to turn back.
- **Traumatic Brain Injuries Disclosure:** US reports reveal [700 service members wounded](#) in Iranian missile strikes, with lawmakers demanding screenings.
- **Qalandia Refugee Camp Incursion:** Israeli forces [demolish homes](#) and convert residential properties into military barracks in a "closed military zone."
- **Iran AI Sovereignty:** Tehran joins [WAICO](#) to leverage Chinese AI resources for its Simorgh supercomputer and defense sites.
- **New Mexico Epstein Lawsuit:** State sues the DOJ to [identify visitors and staff](#) at Epstein's ranch between 1996 and 2012.
- **Fattah Missile Capability:** Experts state Iranian warheads [reach 4 km/s](#) and maneuver during reentry, making THAAD defenses "irrelevant."
- **Israel Internal Factions:** Defense Minister Katz [publicly clashes](#) with military leadership over their failure to silence the West Bank resistance.
- **Gaza Rubble Removal:** Euro-Med Monitor accuses Israel of [clearing 10 million tons of debris](#) to hide evidence of war crimes.
- **US Fuel Price Crisis:** Gas prices hit [\\$4.10 nationally](#), with Hawaii reaching \$5.50, driving consumer confidence to new lows.
- **Pakistan-Iran Trade Milestone:** Industry ministers sign MoUs in [Islamabad](#) for border trade and industrial cooperation.
- **Traumatic Life Story of Avina:** A mother [recounts her eight-year-old daughter's death](#) during a refinery explosion in the city of Ray.
- **Hezbollah Defiance Anniversary:** Fuad Shukur's daughter Khadijah [denounces peace talks](#) in Rome as a "betrayal of martyrs."
- **Hiroshima 81st Anniversary:** Japanese PM calls for the [realization of a nuclear-free world](#) while nuclear states spend billions on arsenals.
- **USS Liberty Mystery Revisited:** A retrospective [alleges President Johnson wanted the ship to sink](#) in 1967 to blame Egypt.
- **Trump Medicare Subsidy Cut:** The administration reportedly [ends Part D subsidies](#), raising drug costs for 11 million Americans.

- **Yemeni Preemptive Strike:** Ansarullah targets the [first and third emergency brigades](#) in Al-Wadi'ah, destroying military warehouses.
- **Italian School Censorship:** Teachers face [ministerial inspections](#) for farewell messages discussing the Gaza strip.
- **Trump Crypto Scam Allegations:** Senator Chris Van Hollen [claims](#) Trump's net worth increased \$2.2 billion via "meme coin scams."
- **Florida Concentration Camps:** Activists [condemn](#) "Alligator Alcatraz" for using \$1 billion in emergency funds to torture 200 migrants.
- **Iran Food Self-Sufficiency:** Reports claim Iran is [exporting agricultural products](#) worth 12% of its total GDP.

ABOUT THIS REPORT

Today's Media Trends is a public interest experiment in applying deep thematic trend analysis to television news coverage from around the world to explore how responsibly applied advanced AI can help journalists and scholars better understand the overarching trends, themes and patterns of our global world.

No data is used to train or tune any AI model.

Each morning, in collaboration with the Internet Archive's TV News Archive, we apply

Google's Gemini 3 to deeply examine yesterday's coverage from each television news channel to tease out the overarching themes and trends of its news coverage into a richly annotated thematic analysis. Each high-level insight is connected back to the original broadcast, allowing journalists and scholars to understand the dominate themes and trends and instantly click out to the underlying sources for details.

By helping journalists and scholars see the broader trends and patterns of global news coverage, this analysis helps them identify relevant stories and coverage they might not otherwise have encountered and uncover connections, emphases and narrative shifts that enable more comprehensive reporting and deeper, evidence-based research.

This report is entirely machine generated using Gemini 3 and may include errors and omissions. Please verify all findings. No data is used to train or tune any AI model.
