THE GDELT PROJECT

THE CONVERGENCE CRISIS: REGIONAL ENVIRONMENTAL & INFRASTRUCTURE FAILURES MEETS GLOBAL GEOPOLITICAL & ENERGY SHOCKS

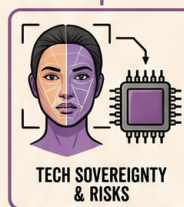

DOMESTIC INSTABILITY & UNREST

Increasing citizen activism against illegal waste (Croatia) & institutional neglect (Bosnia NUB petition). Erosion of trust in 'viral' politicians.

ECONOMIC ENVIRONMENT & INFLATION

Rising energy (AI demand) & food costs. US-Canada trade war with 50% tariffs adds pressure. High infrastructure spending with low returns.

TECH SOVEREIGNTY & RISKS

AI as a double-edged sword: breakthroughs in science (e.g., IVF) vs. deepfake threats, resource competition, and zoning conflicts.

EXTERNAL DYNAMICS & GLOBAL POSTURE

Fragmentation of the West (AFD isolationism). US-Ukraine-Iran nexus: Strained US resources manage concurrent conflicts, impacting Ukraine aid.

STRATEGIC FORESIGHT & RISK ASSESSMENT

SHORT TERM: Escalating protests & wildfire response pressure.

MEDIUM TERM: Ukraine energy crisis & Balkan political stability tests.

LONG TERM: Structural shifts in energy tech vs. persistent infrastructure gaps.

SYSTEMIC INFRASTRUCTURE FAILURE: High Risk of collapse & isolation.

REGIONAL CONFLICT SPOILOVER: Medium Risk of global escalation.

ENVIRONMENTAL HEALTH CRISIS: High Risk of mass illness & unrest.

FUTURE OUTLOOK: The region faces a dangerous intersection of vulnerability. A single large-scale emergency could trigger broader social collapse without unified response and structural reform.

TODAY'S MEDIA TRENDS

N1BOS

AUGUST 24, 2026

REGIONAL ENVIRONMENTAL
EMERGENCIES AND
INFRASTRUCTURE DYSFUNCTION
CONVERGE AMIDST ESCALATING
GLOBAL ENERGY DEMANDS AND
GEOPOLITICAL INSTABILITY.

DAY-AT-A-GLANCE

The Balkan region is currently grappling with a dual crisis of environmental catastrophe and systemic infrastructure failure. Widespread wildfires are ravaging Bosnia and Herzegovina and Serbia, with critical situations reported in [Trebinje and Zvornik](#), where flames have neared residential areas and vital resources. In Serbia, the **Deliblatska Peščara** fire has consumed over 4,000 hectares, prompting a delayed request for [EU civil protection](#) assistance. These events expose significant gaps in regional emergency coordination and the politicization of disaster management, particularly in Serbia where the government faces accusations of prioritizing geopolitics over immediate fire suppression needs.

Simultaneously, the opening of a new 7-kilometer highway section in Bosnia and Herzegovina has become a symbol of

governance dysfunction. The segment, while complete, remains [disconnected from the broader network](#), illustrating the slow pace and fragmentation of the Corridor 5c project. This coincides with a period of intense domestic political maneuvering, characterized by court-ordered reinstatements of regional ministers and a deepening critique of "cartel-style" political parties that prioritize clientelism over public service. The domestic landscape is further strained by rising utility costs and inflation, reflecting broader global trends.

On the international stage, the conflict in Ukraine reaches a symbolic milestone with its 35th independence anniversary, marked by a [visit from former U.S. Vice President Mike Pence](#) and a new €6.1 billion EU aid package. However, the shadow of the Iran-U.S. conflict looms large, with Iranian leadership describing a "full-scale war" and U.S. missile supplies reportedly depleted by Middle Eastern engagements. This global instability is matched by technological anxieties, as the massive energy requirements of the **AI boom** begin to impact local electricity prices and community resources in global data hubs like [Northern Virginia](#).

MAJOR DEVELOPMENTS

- **Regional Wildfire Crisis:** Massive fires across Bosnia, Serbia, and Croatia have exhausted local resources, leading to the deployment of [international helicopter support](#) in Serbia and military intervention in Bosnian cantons. The [Paklinski Islands](#) near Hvar also reported new outbreaks, threatening tourism infrastructure.

- **Infrastructure Stalemate:** The opening of the [Doboj Jug-Medakovo](#) highway section highlights the paradox of Bosnian construction: completed segments that are effectively useless due to a lack of connectivity, with critics citing a 25-year timeline for only 250km of total highway.
- **US-Iran "Full-Scale War":** Statements from the Iranian President and U.S. officials suggest a transition from proxy skirmishes to a more [direct confrontation](#), with significant implications for global energy security and U.S. military readiness in other theaters, notably Ukraine.
- **AI Energy Impact:** Research reveals that AI data centers now consume energy equivalent to entire cities, contributing to a [30% increase](#) in residential electricity prices in high-density areas like Northern Virginia.
- **Health & Science Breakthroughs:** Significant advances in [IVF implantation visualization](#), newborn vitamin B12 screening, and elastocaloric cooling technology offer potential long-term benefits for public health and climate mitigation.

KEY GOVERNANCE TOPICS

Armed Conflict & Militarization: The war in Ukraine remains a focal point as leaders discuss the ["Coalition of the Willing"](#) in Kyiv. Strategic concerns are mounting over the depletion of [Patriot missile inventories](#), which threatens the defense of Ukrainian energy infrastructure ahead of winter. In the Middle East, the failure of the 60-day ceasefire between the U.S. and Iran has led to declarations of [full-scale conflict](#).

Civil Unrest & Social Order: Significant domestic pressure is building in Croatia,

where residents of Gospić are organizing a major protest in Zagreb on September 5 against [illegal waste disposal](#). In Bosnia, the petition for the [National University Library \(NUB\)](#) reflects growing citizen scientists and intellectual activism against the perceived neglect of cultural institutions.

Climate & Extreme Weather: The Balkan wildfire season is proving exceptionally severe, with a [tropical heatwave](#) pushing temperatures to 38-40°C. This extreme weather is taxing emergency services and highlighting the need for more resilient forest management, potentially aided by [AI-driven reforestation planning](#).

Tech Sovereignty & AI: The "AI boom" is presented as a double-edged sword. While providing tools for medical research and environmental modeling, the physical infrastructure of AI—massive data centers—is causing [zoning conflicts](#) and resource competition with residential communities.

Macroeconomics & Trade: A trade war between the U.S. and Canada has escalated with [50% tariffs](#) being exchanged dollar-for-dollar. In Europe, the AFD's calls for Germany to exit the [Eurozone and Schengen](#) threaten to fragment the internal market and create new barriers to trade and movement.

DEEP DIVE: TRENDS AND THEMES

The Paradox of Disconnected Progress: A recurring theme is the existence of high-tech or modern solutions that are rendered ineffective by systemic gaps. The [disconnected highway](#) in Bosnia serves as a physical metaphor for a governance system where individual projects are completed for political show, but the underlying network

remains broken. Similarly, AI models offer "optimized" answers to users while [consuming vast amounts](#) of non-optimized energy, potentially causing more harm to the environment than they solve through efficiency.

Erosion of Institutional Trust: Across multiple reports, there is a clear trend of citizens bypassing formal institutions. In the environmental sector, [citizen scientists](#) are using apps to monitor forests because they do not trust official data or management. In politics, the rise of "viral" politicians on social media [avoids journalistic scrutiny](#), leading to a "mindset of a two-year-old" in governance, where accountability is replaced by marketing and digital impressions.

Resource Competition in the Digital Age: The transition to a high-tech economy is creating new forms of scarcity. The demand for [electricity and water](#) to cool data centers is now in direct competition with the needs of ordinary citizens, leading to 30% price hikes. This suggests a future where "tech-rich" regions may face significant internal social friction as their local resources are harvested to power global digital services.

INTERNAL DYNAMICS & DOMESTIC INSTABILITY

Bosnia and Herzegovina: The state is characterized by profound institutional fragmentation. The [Ustavni Sud \(Constitutional Court\)](#) has had to intervene in regional government changes in the Unsko-Sanski Canton, highlighting the precariousness of local coalitions. The critique of **cartel parties** suggests that the political system is locked in a cycle of clientelism where new actors (like the "Trojka") find it difficult to break [closed systems](#) like the

House of Peoples. Infrastructure failures, such as the [disconnected highway](#), further erode the government's mandate.

Serbia: The government is facing a crisis of credibility regarding its response to wildfires. The delay in seeking international help for the [Deliblatska Peščara](#) fire, combined with threats of prosecution for those "spreading panic" online, suggests a leadership that is more concerned with information control than operational efficacy. The [geopolitical maneuvering](#) over Russian vs. EU aid reflects a state still torn between competing spheres of influence even during domestic emergencies.

Croatia: Domestic stability is being challenged by [ecological grievances](#). The planned protest in Zagreb over waste in Gospić indicates a growing "civilian pressure" that transcends sports and national symbols, moving toward [modern citizenship](#) accountability. The lack of a "protest culture" historically makes this organization significant.

EXTERNAL DYNAMICS & GLOBAL POSTURE

The Fragmentation of the West: The international system is portrayed as increasingly transactional and fractious. The [trade war](#) between the U.S. and Canada, two traditionally close allies, signals a breakdown in the rules-based order. Simultaneously, the **AFD** in Germany is pushing an isolationist narrative that would turn the EU's largest economy into an ["island" within Europe](#), potentially mimicking the negative outcomes of Brexit.

The Ukraine-Iran Nexus: The U.S. posture is under strain as it attempts to manage two

major conflicts simultaneously. The [depletion of Patriot missiles](#) due to Iranian attacks directly impacts the ability to support Ukraine, revealing a strategic vulnerability where one adversary can indirectly degrade U.S. capacity to assist another. This frames the "outside world" as a zero-sum threat matrix for Western resources.

THE ECONOMIC ENVIRONMENT

Market sentiment is dominated by the inflationary pressures of energy and food, exacerbated by regional disasters and global trade disputes. The cost of living is a central concern, with specific attention on the soaring price of [real estate in Sarajevo](#) and the impact of [AI infrastructure](#) on local utility rates.

- **Energy Costs:** Residential electricity prices in Northern Virginia rose by [30% over five years](#) due to data center demand. In Bosnia, [water reductions](#) in Cazin and Bužim were triggered by fire-fighting needs and high consumption.
- **Trade & Tariffs:** The U.S. and Canada have entered a trade war with [50% reciprocal tariffs](#) following the collapse of trade talks. This is expected to significantly impact affordability for American and Canadian consumers.
- **Infrastructure Investment:** The Corridor 5c project continues to consume billions of euros with [minimal connectivity returns](#), raising questions about the efficiency of capital allocation in the Balkans.
- **Food Prices:** Local food costs, particularly [proteins \(meat, poultry, beef\)](#), are rising by 10-20%, leading to nutritional concerns for the population.

LEADERSHIP CHANGES

Significant leadership shifts are occurring in both the political and sporting sectors, reflecting a broader trend of institutional instability and accountability crises.

- **Mustafa Ružnić and Adnan Habibija:** Reinstated as Premier and Interior Minister of [Unsko-Sanski Canton](#) following a Constitutional Court ruling, temporarily reversing a regional power shift.
- **FK Partizan Management:** The [entire board of directors](#) and the head coach, Saša Ilić, have resigned due to the club's catastrophic performance and multi-year crisis.
- **Mike Pence:** The former VP's visit to Kyiv highlights his continued [influence as a pro-Ukraine voice](#) within the Republican faction, contrasting with the more isolationist rhetoric of Donald Trump.
- **Alice Weidel (AFD):** Positioning herself as a [radical alternative](#) in Germany, advocating for an exit from the Euro and Schengen, which would fundamentally alter European leadership dynamics.

EDITORIAL POSTURE & STORY HIERARCHY

The network's lead stories for the day focus heavily on the **wildfire emergency** in Bosnia and Serbia, treated with high urgency and fear-inducing imagery of flames near homes [in Trebinje](#). The secondary focus is **infrastructure dysfunction**, particularly the highway opening, which is framed with a skeptical, almost mocking tone regarding the "disconnected" 7km [segment](#). The broadcast allocates significant time to **science and technology** (DW Science Show), which serves as a cerebral distraction from the grim local

news of fires and political stagnation. The emotional tone oscillates between local frustration and global awe at scientific progress. A **conspicuous omission** is any deep investigation into the origins of the wildfires or specific arrests of arsonists, despite widespread citizen suspicion of "podmetnuti" (planted) fires [in Cazin](#).

GEOPOLITICAL FRAMING

The broadcast portrays a world where regional powers are struggling with basic services while global superpowers engage in high-stakes resource and military competition.

- **Ukraine** is framed as a **resolute but vulnerable** defender of freedom. While Mike Pence claims they are "winning the war," the subtext of [missile shortages](#) and impending winter attacks paints a picture of a nation at a precarious tipping point.
- **Iran** is portrayed as a **defiant and dangerous** aggressor. The rhetoric of "full-scale war" [against the US](#) and the use of drones against Russia/Ukraine frame the Iranian regime as a central node of global instability.
- **Serbia** is characterized as **incompetent and defensive**. The delay in fire assistance and the [geopolitical dither](#) over Russian vs. Western help portrays a government that fails its citizens in favor of regional posturing.
- **Bosnia and Herzegovina** is framed as **fragmented and stagnant**. The focus on the [highway dysfunction](#) and "cartel parties" suggests a state where meaningful progress is obstructed by its own political structure.

- **The United States** is portrayed as a **strained superpower**, struggling to balance a [trade war with neighbors](#) and multiple military commitments, leading to the exhaustion of its strategic reserves.

INFORMATION WARFARE ENVIRONMENT

- **Suppression of Panic vs. Suppressing Truth:** The Serbian government and prosecution are weaponizing the charge of ["širenje panike"](#) (spreading panic) to discourage social media documentation of fire-fighting failures. This is a classic narrative control tactic to minimize domestic fallout during an election campaign.
- **AI Deepfakes:** The broadcast warns of increasingly realistic [deepfakes on the dark web](#), including sexualized images of children, which challenge the definition of "innovation" and pose a massive threat to social order.
- **Viral Politics:** Politicians are increasingly using [TikTok and Instagram](#) to bypass traditional media, creating a "bubble" of simulated accessibility that avoids difficult questions and facilitates propaganda [direct to voters](#).

HYPOTHESES AND FUTURE OUTLOOK

- **Escalation of Social Unrest:** The Gospić waste protest [in Croatia](#) and the dissatisfaction over highway connectivity in Bosnia likely represent the start of a more organized, issue-based civil activism that could challenge incumbent parties in the 2026 elections.

- **Strategic Pivot in U.S. Alliances:** The depletion of missile stocks may force the U.S. to lean more heavily on [South Korean interceptors](#), potentially shifting the balance of military dependence and influence in the Indo-Pacific and Middle East.
- **Tech-Driven Resource Conflict:** As AI energy demand grows, expect a rise in [local legislation](#) aimed at limiting data center expansion to protect residential utility rates, creating a clash between national economic goals and local survival.

STRATEGIC FORESIGHT

Short Term (1-4 Weeks): Expect a significant turnout for the [September 5 waste protest](#) in Zagreb, which could trigger similar environmental protests across the Balkans. The arrival of [EU fire-fighting teams](#) in Serbia will likely mitigate the fires but increase political pressure on the Vučić administration regarding its delay in requesting aid.

Medium Term (1-6 Months): The winter will be a critical test for [Ukraine's energy grid](#); if U.S. Patriot supplies remain low, a major humanitarian crisis is likely. Domestically, the Bosnian [Constitutional Court decisions](#) will test the stability of regional government coalitions ahead of the new year.

Long Term (1-5 Years): Structural changes to refrigeration and energy consumption, such as [elastocaloric technology](#), could begin to reach niche markets, offering a partial solution to the rising global electricity demand. However, the [infrastructure gap](#) in the Balkans will continue to hinder EU integration unless there is a fundamental overhaul of the "cartel party" system.

RISK ASSESSMENT

The region faces a dangerous intersection of environmental vulnerability and political erosion, where a single large-scale emergency could trigger broader social collapse.

- **Systemic Infrastructure Failure:** The failure to connect major transport corridors limits economic growth and emergency response capacity. Triggers: Major bridge or tunnel collapse due to poor maintenance or corruption. Likelihood: High. Impact: Severe economic stagnation and regional isolation. Mitigations: International auditing of infrastructure projects and transparency in funding.
- **Regional Conflict Spillover:** The U.S.-Iran confrontation escalating into direct warfare. Triggers: A major strike on a U.S. carrier or Iranian energy facility. Likelihood: Medium. Impact: Global oil shock and potential involvement of proxy forces in the Balkans. Mitigations: Resumed diplomatic channels and regional de-escalation agreements.
- **Environmental Health Crisis:** The combination of illegal waste [in Gospić](#) and toxic smoke from wildfires/industrial sites (like the [Tuzla smoke plume](#)). Triggers: Contamination of major water sources in the Lika region. Likelihood: High. Impact: Mass illness and mass civil unrest. Mitigations: Immediate professional sanitation of illegal dumpsites.

- **Strategic Military Vulnerability:** The exhaustion of Western air defense systems. Triggers: Sustained missile barrages in both the Middle East and Ukraine simultaneously. Likelihood: Medium. Impact: Total loss of air superiority for U.S.-backed forces. Mitigations: Rapid scaling of manufacturing and procurement from non-traditional allies like South Korea.
- **Information Collapse:** The erosion of truth through [AI deepfakes](#) and viral political propaganda. Triggers: A highly realistic fake video of a national leader during a crisis. Likelihood: High. Impact: Civil violence or illegitimate regime change. Mitigations: Mandatory watermarking for AI content and public media literacy campaigns.

GAPS & BLIND SPOTS

- **Wildfire Forensics:** There is a total lack of data on the causes of the fires; while "arson" is suspected, no investigative details are provided, leaving a vacuum for disinformation.
- **Economic Connectivity:** The transcripts do not explain **why** the highway segments are disconnected (e.g., funding gaps, land disputes, or specific political vetoes), only that they are.
- **US-Canada Trade Details:** The specific industries affected by the [50% tariffs](#) are not named, which is crucial for assessing sectoral economic impact.
- **EU Aid Distribution:** The mechanism for how the [€6 billion EU aid](#) to Ukraine will be spent (defense vs. reconstruction) is not detailed.

CONTRARIAN NARRATIVE SCENARIOS

- **Managed Crisis Hypothesis:** The delay in fire-fighting in Serbia and the "disconnected" highways in Bosnia might not be incompetence but **deliberate resource management** to prioritize funding for elite interests while maintaining a state of perpetual minor crisis to distract from deeper structural theft.
- **AI as a Social Stabilizer:** Contrary to the fear of deepfakes, AI might be the only tool capable of [processing the complexity](#) of the climate crisis and forest management faster than human bureaucracy, potentially saving ecosystems before they collapse.
- **Black Swan Event:** The ["Full-Scale War"](#) declaration by Iran leads to a sudden blockade of the Strait of Hormuz, causing a global energy price spike that instantly halts all construction on the Corridor 5c and other regional infrastructure projects, leading to immediate regime instability across the Balkans.

RECOMMENDATIONS & IMPLICATIONS

For Statecraft/Public Sector:

- Prioritize the **unification of emergency response** protocols across Balkan borders to bypass political delays during wildfire seasons.
- Accelerate the procurement of **non-U.S. air defense** systems for European security to mitigate the risk of U.S. inventory depletion.

- Implement **transparent zoning** for data centers to prevent social conflict over energy and water resources.

For Private Sector/Investors:

- Diversify **supply chains** away from the U.S.-Canada corridor due to the emerging trade war and 50% tariff risks.
- Invest in **green cooling** and energy-efficient building materials (like [soil blocks](#)) to anticipate future environmental regulations and high energy costs.
- Exercise caution in **Balkan infrastructure bonds** given the systemic delays and "disconnected" project risks highlighted by the Corridor 5c status.

LEGISLATIVE ROUNDUP

Legislative activity centered on regional governance and international aid packages. The U.S. and Canada failed to reach a trade agreement, leading to a [reciprocal tariff policy](#). In Europe, the EU Commission formalized a massive defense and financial aid package for Ukraine.

- **BILLS DISCUSSED/DEBATED:**
 - **EU Ukraine Aid Package:** €6.1 billion for defense systems and ammunition, part of a larger €90 billion loan facility [approved by the EU](#).
 - **US-Canada Reciprocal Tariffs:** Implementation of 50% tariffs on a dollar-for-dollar basis [effective immediately](#).
 - **Bosnian Electoral Law Petitions:** Ongoing calls for the removal of "cartel party" influence and [investigations into ID theft](#) in the voting process.

• HEARINGS & PRESS EVENTS:

- **Mike Pence in Kyiv:** Address at the National Prayer Breakfast marking the [35th anniversary](#) of Ukraine's independence.
- **Croatian Saborska Rasprava:** Extraordinary session on waste management following the Gospić illegal [dumping scandal](#).
- **UN Construction Industry Report:** Announcement that the building sector is the [world's biggest polluter](#), accounting for 34% of CO2.

KEY STORIES

- **Wildfires in Bosnia and Serbia:** Major fires are active in Trebević, Trebinje, Zvornik, Cazin, and Nevesinje. Helicopters from the [EU Rescue fleet](#) (Czechia, Romania, Slovakia) and ground teams from Germany are assisting in Serbia's Deliblatska Peščara, where 4,000 hectares have burned.
- **Highway Corridor 5c Dysfunction:** A new 7km stretch between [Doboj Jug and Medakovo](#) was opened but is not connected to the rest of the highway, costing billions with little immediate utility.
- **US-Iran War Declaration:** The Iranian President declared a [full-scale war](#) with the US as a 60-day ceasefire expired without a peace deal.
- **Mike Pence Visit to Ukraine:** Pence visited Kyiv to mark 35 years of independence, meeting [Zelensky](#) and discussing the need for air defense systems.
- **Gospić Waste Protests:** Citizens in Croatia are organizing a [September 5 protest](#) in Zagreb against illegal waste disposal, with four buses already filled.

- **AI Energy Consumption Crisis:** Research in [Northern Virginia](#) shows AI data centers are causing residential electricity price spikes and local noise pollution.
- **Elastocaloric Cooling:** Researchers at [Zarland University](#) are developing a new cooling method using nickel-titanium wires that could cut fridge energy use by half.
- **IVF Implantation Visualization:** Microscopic images from [international research teams](#) have successfully captured the moment an embryo implants in a simulated uterus for the first time.
- **National Library (NUB) Petition:** Intellectuals and citizens have launched a [petition for the salvation](#) of the National and University Library of Bosnia and Herzegovina.
- **Goražde City Profile:** A feature on the history and current industrial status of [Goražde](#), noting its status as a "City Hero" and its Sephardic heritage.
- **Museum of Islamic Culture and Art:** Sarajevo will open a new museum on [September 4](#) to showcase Islamic heritage in a European context.
- **Partizan Management Resignation:** The entire [FK Partizan management](#) has resigned amidst a performance crisis.
- **Vuelta a España Weather Delay:** The third stage of the [cycling tour](#) was canceled due to dangerous ice and storms in the Pyrenees.
- **Tuzla Termoelektrana Smoke:** A technical failure at [Block 4](#) caused a massive dust/smoke plume, alarming residents and highlighting aging infrastructure risks.
- **East Sarajevo Shootings:** Attempted murders involving [Đorđe Ždrale](#) and Davor Dabić have led to international warrants and investigations in Serbia.
- **Eurovision Boycott:** The Netherlands' [AvroTros emitter](#) announced a continued boycott of the contest due to Israel's participation and lack of clear rules for war-involved countries.
- **Music for the Deaf:** New vibration platforms are being [tested in Switzerland](#) to allow hearing-impaired concertgoers to "feel" live music physically.
- **Sustainable Construction:** A Berlin-based startup is making [eco-bricks from soil waste](#) that emit 97% less CO2 than traditional kiln-fired bricks.

ABOUT THIS REPORT

Today's Media Trends is a public interest experiment in applying deep thematic trend analysis to television news coverage from around the world to explore how responsibly applied advanced AI can help journalists and scholars better understand the overarching trends, themes and patterns of our global world.

No data is used to train or tune any AI model.

Each morning, in collaboration with the Internet Archive's TV News Archive, we apply Google's Gemini 3 to deeply examine yesterday's coverage from each television news channel to tease out the overarching themes and trends of its news coverage into a richly annotated thematic analysis. Each high-level insight is connected back to the original broadcast, allowing journalists and scholars to understand the dominate themes and trends

and instantly click out to the underlying sources for details.

By helping journalists and scholars see the broader trends and patterns of global news coverage, this analysis helps them identify relevant stories and coverage they might not otherwise have encountered and uncover connections, emphases and narrative shifts that enable more comprehensive reporting and deeper, evidence-based research.

This report is entirely machine generated using Gemini 3 and may include errors and

omissions. Please verify all findings. No data is used to train or tune any AI model.

For questions or suggestions, please contact kalev.leetaru5@gmail.com.
