THE GDELT PROJECT

CHINA PROJECTS STABILITY:

Strategic Diplomacy & High-Tech Integration Amidst Global Turbulence (Report: Nov 2, 2026)

DAY-AT-A-GLANCE: A Vision of Control. Structural financial stabilization, rapid integration of Physical AI, and long-term ecological governance define China's trajectory. High-level diplomacy positions China as a rational mediator, contrasting sharply with a chaotic global environment.

PILLARS OF STABILITY & DEVELOPMENT

STRATEGIC DIPLOMACY & ENERGY SECURITY

Xi Jinping hosts **Sultan of Oman,** emphasizes energy & AI

Xi & Peru's Fujimori mark **55 years** & **Free Trade Agreement.**

Envoys sent to **Middle East & Africa** for mediation.

INSTITUTIONALIZED MARKET SUPPORT

PBOC makes temporary tools permanent (e.g., SFISW 100bn+ yuan).

Loan pricing shifts to **diversified market system** for better transmission.

LEGAL & REGULATORY MODERNIZATION

NPC reviews **Criminal Procedure Law amendments** (juvenile protection, legal aid).

New land use regulations protect cultivated layer.

PHYSICAL AI BREAKTHROUGH (WUZHEN)

Wuzhen Summit focuses on AI understanding **physical laws** for robotics.

Exhibits: Automated hot-frying, 3D AI blackboards.

Transition from concept to industrial application.

CONTRAST & GOVERNANCE: ORDER VS. TURBULENCE

GLOBAL DEMOCRATIC TURBULENCE & CONFLICT

US Midterms Chaos (partisan dysfunction, voter lawsuits)

Iran Tensions (drone downings, "heavy hammer" threats)

Sudan Infrastructure Attacks

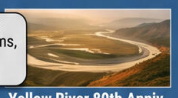

Spain Rail Safety Crisis (aged systems failures)

Narrative Foil: Fracturing Systems, "Chaotic" Environments

Narrative Anchor: Unified, Efficient, Long-Cycle Capacity

CHINA'S STRATEGIC GOVERNANCE & FORESIGHT

Yellow River 80th Anniv. ("Great Protection, Great Synergy")

AI Regulation (de-hyping fraud, defining boundaries)

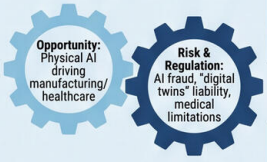

Military Meritocracy ("theoretical machine exams" for NCOs)

Critical Infrastructure ("systemic risk" safeguard in finance)

DEEP DIVE TRENDS & FUTURE OUTLOOK

THE DUAL-REALITY OF AI

Effort to ground AI in "real world" while aggressively regulating vulnerabilities.

INSTITUTIONALIZING "CRISIS" TOOLS

Shift to permanent state-backed liquidity to provide a "national team" floor for markets, preventing vicious cycles.

GEOPOLITICAL & STRATEGIC FORESIGHT

Short Term: Market volatility, Hormuz mediation.

Medium Term: Archaeology as soft power, Physical AI standards.

Long Term: Post-petrodollar energy architecture, cross-border e-CNY.

LEGISLATIVE ROUNDUP & IMPLICATIONS

KEY LEGISLATIVE ROUNDUP (14th NPC Standing Committee)

- ✓ Criminal Procedure Law Amendment
- ✓ Water Law Revision (Yellow River governance)
- ✓ Anti-Cross-Border Corruption Law
- ✓ Financial Law Amendment

STRATEGIC IMPLICATIONS & RECOMMENDATIONS

Statecraft/Public:

- Prioritize Hormuz mediation.
- Accelerate loan reforms.
- Lock in digital infrastructure standards.

Private Sector/Investors:

- Monitor Physical AI supply chains.
- Implement AI asset traceability for compliance.
- Invest in intelligent infrastructure retrofitting.

TODAY'S MEDIA TRENDS

CCTV13

NOVEMBER 2, 2026

CHINA PROJECTS STABILITY THROUGH STRATEGIC DIPLOMACY AND HIGH-TECH INTEGRATION AMIDST GLOBAL DEMOCRATIC TURBULENCE

DAY-AT-A-GLANCE

On November 2, 2026, Chinese state media presented a vision of a nation firmly in control of its developmental trajectory, characterized by **structural financial stabilization** and the rapid **integration of Artificial Intelligence** into the physical economy. Domestically, the government prioritized long-term ecological governance and the modernization of its **legal framework** through the 14th National People's Congress Standing Committee. High-level diplomacy with Middle Eastern and South American partners underscored China's efforts to position itself as a **rational mediator** and reliable trade hub, contrasting sharply with the "chaotic" partisan environment portrayed in the United States ahead of the November 3rd midterm elections.

The economic narrative centered on the People's Bank of China (PBOC) institutionalizing market support mechanisms, transitioning from "temporary" to **permanent monetary tools** to ensure capital market liquidity. This financial engineering is coupled with a technological push at the Wuzhen World Internet Conference, where "Physical AI" and **humanoid robotics** are being transitioned from laboratory concepts to industrial applications. However, the rise of AI is also presented as a double-edged sword, with significant coverage devoted to **AI-driven fraud** and the limitations of large models in high-stakes fields like clinical medicine, signaling an emerging focus on **regulatory boundaries** for the digital age.

MAJOR DEVELOPMENTS

1. High-Level Diplomacy and Energy Security

- President Xi Jinping received the Sultan of Oman, Haitham bin Tariq, for a state visit in Beijing, emphasizing energy cooperation and AI exchanges.
- Xi and Peruvian President Keiko Fujimori exchanged congratulations on the 55th anniversary of diplomatic ties, highlighting the entry into force of the upgraded Free Trade Agreement.
- China announced it would send special envoys to the Middle East and Africa (specifically Iran, Oman, and Saudi Arabia) to mediate regional tensions.

2. Institutionalization of Market Support Policies

- The PBOC announced that the Securities, Funds, and Insurance Companies Swap Facility (SFISW) had received applications exceeding 100 billion yuan, transitioning the policy to a **long-term institutional arrangement**.

- Loan pricing is moving from a single LPR benchmark to a more diversified market-based system to improve monetary policy transmission.

3. Legal and Regulatory Modernization

- The 14th NPC Standing Committee reviewed amendments to the Criminal Procedure Law, focusing on juvenile protection, non-guilty presumption, and legal aid for victims.
- New regulations were issued regarding the differentiated management of land use for facility agriculture, strictly protecting the "cultivated layer" while allowing expansion on non-arable land.

4. The "Physical AI" Breakthrough at Wuzhen

- The 2026 World Internet Conference Wuzhen Summit focused on Physical AI and Spatial Intelligence, aiming to give AI a "brain" that understands physical laws to drive industrial robotics.
- The "Light of Internet" Expo featured automated hot-frying stations capable of cooking standard dishes and AI blackboards for 3D geometric visualization.

KEY GOVERNANCE TOPICS

Armed Conflict & Militarization

- US-Iran tensions escalated as Trump threatened military "heavy hammers" against Iranian targets after the midterm elections.
- Iranian military claimed the destruction of US MQ-9 and MQ-170 drones near the Strait of Hormuz.
- The Sudan Armed Forces reported drone attacks on power stations and oil storage, causing widespread outages.

Tech Sovereignty & AI

- Chinese researchers published findings in *NPJ Digital Medicine* showing that AI models average 64.35% in medical exams, concluding they cannot yet replace human doctors due to a lack of situational context.
- The emergence of "Digital Twins" of experts on health apps is raising concerns about legal liability and unauthorized use of doctor identities.

Critical Infrastructure Security

- A major investigation into Spain's high-speed rail safety revealed that old LCB control systems have caused over 170 failures this year, highlighting the cost of maintenance neglect.
- The PBOC facility for financial institutions is explicitly framed as a safeguard against "systemic risk" in the bond market during extreme volatility.

Leadership Dynamics & Governance

- President Xi Jinping issued critical instructions on the 80th anniversary of Yellow River management, demanding "great protection and great synergy."
- The selection of senior non-commissioned officers (Senior Sergeants) in the PLA is being modernized with "theoretical machine exams" and intelligent monitoring to ensure technical expertise at the tactical level.

DEEP DIVE: TRENDS AND THEMES

The Dual-Reality of AI Development There is a concerted effort to ground AI in the "real world." The Wuzhen Summit shifted the narrative from generative chatbots to "Physical AI" and "Spatial Intelligence" that can drive humanoid robots in manufacturing and healthcare. Simultaneously, state media is aggressively "de-hyping" AI by exposing its vulnerabilities. Extensive segments on AI-generated fraud (using digital avatars to fake relationships) and "fake" AI model photos in e-commerce serve as a foundation for forthcoming tighter regulation under the 15th Five-Year Plan.

Institutionalization of "Crisis" Tools A significant shift occurred in financial governance: tools once described as "emergency" or "temporary" interventions to support the stock market are being made permanent institutional fixtures. The stock repurchase re-lending policy's transition signals a realization that the market requires a **"national team" floor** indefinitely. This indicates a move toward a "controlled market" model where state-backed liquidity is always on standby to prevent the "vicious cycle of redemption and selling" seen in the bond markets.

Governance via Ecological Symbolism The 80-year milestone of Yellow River management is leveraged to demonstrate the CCP's **long-cycle governance capacity**. Reports contrast the historical "two breaches every three years" with current stability. By linking ecological success to high-quality development, the state reinforces the message that environmental protection is no longer a constraint on growth but its new driver, particularly in the "Western Soil City" of Baotou recovering its wetlands.

INTERNAL DYNAMICS & DOMESTIC INSTABILITY

Social Stability & Labor Rights China is grappling with the **legal gray zones of the gig economy**. Courts in Beijing and Shanghai are issuing landmark rulings on "new employment forms," holding delivery platforms liable for accidents even when drivers are between orders. The sudden death of a Didi driver during vehicle charging highlighted the need for occupational injury insurance that does not depend on a traditional labor relationship, reflecting a state response to potential grassroots labor unrest.

Anti-Corruption & Factional Discipline The expulsion of **Guo Yonghang**, former Vice Chairman of the Guangdong Provincial CPPCC, for "losing his ideals and missions" and accepting "high-end medical services" indicates an ongoing purge of provincial elites who leverage private business ties for personal gain. This reinforces the "strict governance of the Party" theme coming out of the 20th Central Committee's Fifth Plenum.

EXTERNAL DYNAMICS & GLOBAL POSTURE

Strategic Mediation in the "Hormuz Dilemma" China is positioning itself as the **adult in the room** regarding Middle East tensions. While the US midterm rhetoric focuses on "military hammers," China's coverage of the Iran "2-day plan" for reopening the Strait of Hormuz frames Iran as "acting in good faith" while the US is "unreasonable" for demanding permanent

concessions in exchange for temporary pauses. The dispatch of Chinese special envoys to the region is a clear signal of power projection through statecraft.

US Midterms as a Narrative Foil The broadcast portrays the US as a **fracturing system**. Reports highlight democratic candidates "betraying" their party to support Republicans in Michigan and a GOP candidate using an opponent's mother in attack ads in Ohio. This "chaos" is presented as a direct contrast to China's "unified and efficient" execution of the 15th Five-Year Plan.

THE ECONOMIC ENVIRONMENT

The financial environment is defined by a shift toward **proactive liquidity management** and the stabilization of the real estate sector via "bridge loans" (though these are also a source of fraud). The Canton Fair remains a vital indicator of export health, with a 21.4% increase in top-tier purchasing companies attending.

Key Economic Vectors:

- **Capital Markets:** SFISW swap balance currently at 100 billion yuan; PBOC conducted 541 billion yuan in overnight reverse repos at fixed rates.
- **Commodities:** International oil prices fell by 7.6% (Brent closed at $96.46/barrel) due to perceived progress in US-Iran "indirect" negotiations.
- **Currency/Banking:** Shift to "Dual Anchor" loan pricing mixing LPR with market costs to improve bank profit margins and rate transmission.
- **Consumer Trends:** Rise of "freshness-first" consumption in Shanghai, with automated retail stores offering items with clean labels and short shelf lives.

LEADERSHIP CHANGES

Leadership focus is currently on technical meritocracy and the purging of non-compliant local officials, with a strong emphasis on **Sultan Haitham's** visit as a high-priority diplomatic win.

- **Guo Yonghang (Guangdong):** Officially expelled and investigated for serious violations of discipline and law, signaling a zero-tolerance policy toward provincial corruption.
- **Haitham bin Tariq (Oman):** Elevated in stature; described as a key strategic partner in energy and regional security.
- **Xia Enlan (Hysteroscopy Pioneer):** Publicized as a national role model (94 years old), representing the fusion of patriotism and medical innovation.
- **Iliana Iotova (Bulgaria):** Re-elected as President of Bulgaria, framed as a win for continuity in an EU member state.

EDITORIAL POSTURE & STORY HIERARCHY

The editorial tone is **calculated and analytical**, avoiding overt triumphalism while emphasizing **order and efficiency**. The "Lead Stories" focus on Xi's diplomacy (Oman/Peru) and the Yellow River instructions, establishing a narrative of **sovereign vision**. "Buried Stories" include the US plane crash in Florida and maritime explosions in Hormuz, which are treated as technical events rather than human tragedies. **Conspicuous Omissions:** There is almost no mention of China's current domestic debt levels or specific youth unemployment figures, despite the heavy focus on "stabilizing the market."

GEOPOLITICAL FRAMING

China’s framing of the world stage revolves around the struggle between "orderly development" (China/Global South) and "partisan decay" (The West).

COUNTRIES

- **Oman:** Portrayed as a "strategic anchor" in the Middle East. Quote: "Energy cooperation is becoming more three-dimensional and comprehensive."
- **USA:** Framed as unstable and prone to unilateral aggression. Quote: "Midterm elections are referenda on job performance... neither party can effectively address citizen demands."
- **Iran:** Portrayed as a cautious partner seeking "security for the Strait." Quote: "A Hormuz opening depends entirely on the US acting in good faith."

LEADERS

- **Xi Jinping:** Portrayed as a **principled and far-sighted architect** of domestic and global order.
- **Donald Trump:** Portrayed as a **disruptive force** using threats to manage domestic campaign pressures. Quote: "Trump praised the defection... while the Democrats face deep internal divisions."
- **Donald Tusk:** Portrayed as a **leader in conflict**, struggling with the "constitutional coup" narrative in Poland.

INFORMATION WARFARE ENVIRONMENT

Narrative Seeding: The "US Chaos" Mirror State media is using the **US Midterms** to seed the narrative that Western democracy is inherently unstable. By focusing on lawsuits regarding voter eligibility in California and personal scandals in Ohio, the broadcast suggests that democratic processes lead to **"structural confrontation"** rather than solutions. This serves to justify China's centralized governance model.

The AI "Truth" Campaign The report on AI's failures in medical exams is likely a state-sanctioned psychological operation to temper public enthusiasm for private-sector AI solutions that might bypass state-controlled medical systems. It effectively frames the **State as the necessary guardian** of "human-centric" technology.

HYPOTHESES AND FUTURE OUTLOOK

- **Energy Hub Realignment:** China will likely finalize the China-GCC Free Trade Agreement within the next 6 months, using the momentum from the Oman visit to secure long-term LNG and oil discounts.
- **Regulatory Crackdown on AI E-commerce:** Following reports on AI-generated "fake" product photos, a new "Truth in Digital Advertising" regulation is highly probable by Q1 2027.
- **Gig Economy Formalization:** The court rulings on driver deaths and accidents suggest a national policy change to force platforms to contribute to social security funds for non-contracted laborers.

STRATEGIC FORESIGHT

Short Term (1-4 Weeks): Expect **market volatility** immediately following the US midterm results, with the PBOC potentially deploying its permanent swap facility to counter spillover effects on the A-share

market. Diplomatic envoys will reach Tehran and Riyadh to manage the Hormuz flashpoint.

Medium Term (1-6 Months): The 15th Five-Year Plan for **Archaeology** will serve as a soft-power push to unify "national consciousness" along the Belt and Road. Regulatory frameworks for "Physical AI" will emerge to ensure China maintains a lead in humanoid robot industrial standards as seen in Wuzhen.

Long Term (1-5 Years): China is moving toward a **post-petrodollar regional energy architecture**. The "Digital Finance" cooperation agreements signed with Oman are the early blocks for cross-border e-CNY settlement in the energy sector.

RISK ASSESSMENT

- **Strait of Hormuz Blockade:** Iran has warned that without US compliance, the "2-day plan" will fail, potentially leading to a permanent closure. **Triggers:** US precision strikes after midterm elections. **Likelihood:** Moderate. **Impact:** Catastrophic (global energy price spike). **Mitigations:** Chinese special envoy mediation starting in November.
- **AI-Driven Identity Crisis:** The proliferation of unauthorized medical digital twins could erode trust in the digital healthcare system. **Triggers:** A high-profile medical malpractice case involving an AI avatar. **Likelihood:** High. **Impact:** High (legal and social disorder). **Mitigations:** Mandatory "AI-Generated" labeling and blockchain-based doctor identity verification.
- **Spanish-Style Rail Maintenance Deficit:** The Spanish high-speed rail crisis caused by aged LCB systems serves as a warning for China's aging first-generation HSR lines. **Triggers:** Budget cuts to operational maintenance. **Likelihood:** Low in China, but a risk for exported tech. **Impact:** Moderate to High. **Mitigations:** Accelerated deployment of ERTMS-style intelligent monitoring.
- **US Post-Election Instability:** Allegations of judicial "weaponization" in the US midterm process could lead to civil unrest. **Triggers:** Contested results in key swing states. **Likelihood:** High. **Impact:** Moderate (global market volatility). **Mitigations:** Chinese diplomatic distancing and "stable leader" narrative reinforcement.
- **Juvenile Crime Backlash:** Amendments to the Criminal Procedure Law regarding juveniles might conflict with public calls for harsher punishments. **Triggers:** A viral juvenile crime case. **Likelihood:** Moderate. **Impact:** Low to Moderate. **Mitigations:** Propaganda emphasizing **"Rule of Law" balance**.

GAPS & BLIND SPOTS

- **Economic Data Absence:** While the broadcast details **swap facilities**, it fails to explain the **actual debt-to-GDP ratios** of the provincial governments that are supposed to implement the "Yellow River synergy."
- **Iran's Tactical Reality:** The reports mention Iranian drones destroying US assets, but do not offer independent verification, ignoring potential Iranian losses or the state of their domestic air defenses.

- **Sustainability of Wuzhen Tech:** Humanoid robots are shown in staged environments (making coffee, frying food). The transcripts lack detail on **power efficiency and maintenance costs** which currently prevent large-scale industrial adoption.
- **US Midterm Voter Sentiment:** The coverage focuses exclusively on partisan dysfunction, failing to report on actual economic concerns (inflation, jobs) that might be driving the electorate, providing a one-dimensional view of US politics.

CONTRARIAN NARRATIVE SCENARIOS

The "Managed Decline" Scenario The PBOC's move to make market support tools permanent could be seen not as a sign of strength, but as a **desperate admission** that the private sector is no longer capable of organic growth. In this lens, institutionalizing the SFISW facility is an attempt to mask an **impending capital flight** by tethering the financial sector inextricably to the central bank.

AI as an Anti-Bureaucracy Weapon While the broadcast frames AI as limited in medicine, a contrarian view suggests that the government is afraid of AI's potential to **disrupt state-run bureaucracies**. If AI can provide 64% accuracy today, it could democratize expertise and weaken the state's monopoly on "the expert." The focus on fraud may be a pre-emptive strike to delegitimize non-state digital services.

Black Swan Event: Hormuz Escalation A highly unlikely but possible event is a **joint Iran-China-Oman maritime security zone** that excludes Western navies. If the maritime mine explosions continue, China might use its "Special Envoy" role to propose a new security architecture, effectively ending US naval hegemony in the Gulf overnight.

RECOMMENDATIONS & IMPLICATIONS

For Statecraft/Public Sector:

- **Security:** Prioritize "Hormuz mediation" to prevent energy shocks during the 15th Five-Year Plan startup phase.
- **Economic:** Accelerate the "Dual Anchor" loan reforms to protect domestic banks from LPR compression.
- **Diplomatic:** Leverage the 11th Lancang-Mekong Foreign Ministers' Meeting to lock in digital infrastructure standards in SE Asia.

For Private Sector/Investors:

- **Supply Chains:** Monitor the "Physical AI" developments in Wuzhen; early movers in humanoid manufacturing automation will receive heavy state subsidies.
- **Compliance:** E-commerce platforms must immediately implement **traceability for AI-generated assets** to avoid legal action for consumer fraud.
- **Capital Allocation:** High-speed rail maintenance and "intelligent retrofitting" represent a growing sector as first-gen infrastructure hits its safety limits.

LEGISLATIVE ROUNDUP

The current legislative window is dominated by the **14th NPC Standing Committee's 25th meeting**, which is prioritizing institutional safeguards for social stability, financial integrity, and resource management.

BILLS DISCUSSED/DEBATED:

- **Criminal Procedure Law Amendment:** Strategic intent is to harmonize law enforcement with "human rights safeguards" while optimizing juvenile case handling.
- **Water Law Revision:** Intent is to provide a legal basis for the unified governance of the Yellow River and national water networks.
- **Anti-Cross-Border Corruption Law:** A new tool to protect Chinese investments overseas under the Belt and Road Initiative.
- **Financial Law Amendment:** Focused on systemic risk prevention and central bank authority in market interventions.

HEARINGS & PRESS EVENTS:

- **National Medical AI Ethics Platform:** Staff at the Shanghai AI Lab announced the first national evaluation platform for medical large models.
- **Yellow River Management Presser:** Officials from Qinghai, Gansu, Henan, and Shandong reported on 80 years of progress and future synergy goals.
- **Canton Fair Media Briefing:** Highlighting a record number of "Top-tier" buyers (494 companies), signaling resilience in foreign trade.

KEY STORIES

- **Xi Jinping and Sultan of Oman State Visit:** A comprehensive strategic meeting focused on energy, AI, and regional peace.
- **Yellow River 80th Anniversary:** Xi issues instructions to prioritize ecological protection and high-quality development across the river basin.
- **PBOC SFISW Institutionalization:** The central bank makes temporary market support tools permanent to ensure liquidity for funds and insurance companies.
- **Criminal Procedure Law Review:** The NPC reviews amendments protecting juveniles and victims' rights.
- **Wuzhen Summit - Physical AI:** The 2026 conference highlights AI that can understand physical world laws for robotics.
- **AI Fraud Syndicate Bust:** Shanghai police dismantle an AI-driven romantic fraud ring that cheated victims out of 1.8 million yuan.
- **US Midterm Chaos:** Reports on partisan fighting over voter identities in California and candidates switching parties in Michigan.
- **Iran Hormuz "2-Day Plan":** Tehran proposes a simplified schedule to reopen the Strait of Hormuz if the US meets specific conditions.
- **Spain Rail Safety Crisis:** A report reveals that aged safety systems (LCB) are causing over 170 failures on high-speed lines.
- **Sudan Infrastructure Attacks:** Military and RSF conflict damages power grids and oil storage facilities.
- **Gig Economy Liability Rulings:** Courts rule delivery platforms must pay damages for accidents occurring between orders.
- **Archaeology 15th Five-Year Plan:** National Heritage Board introduces a 5-year roadmap for deepening research into Chinese civilization.
- **Xia Enlan - The "Mother of Hysteroscopy":** A profile of the 94-year-old pioneer who revolutionized gynecology in China.

- **Mamenchisaurus Restoration:** Shanghai Nature Museum restores the correct head for its 54-year-old dinosaur exhibit using 3D printing and CT scans.
- **Tibet Student Transfer:** 589 students from Nakchu relocate to Lhasa for improved educational facilities and health monitoring.
- **Robot Mountain Climbing Race:** Over 90 teams compete on Mount Tai to test robot environment perception and power efficiency.

ABOUT THIS REPORT

Today's Media Trends is a public interest experiment in applying deep thematic trend analysis to television news coverage from around the world to explore how responsibly applied advanced AI can help journalists and scholars better understand the overarching trends, themes and patterns of our global world.

No data is used to train or tune any AI model.

Each morning, in collaboration with the Internet Archive's TV News Archive, we apply Google's Gemini 3 to deeply examine yesterday's coverage from each television news channel to tease out the overarching themes and trends of its news coverage into a richly annotated thematic analysis. Each high-level insight is connected back to the original broadcast, allowing journalists and scholars to understand the dominate themes and trends and instantly click out to the underlying sources for details.

By helping journalists and scholars see the broader trends and patterns of global news coverage, this analysis helps them identify relevant stories and coverage they might not otherwise have encountered and uncover connections, emphases and narrative shifts that enable more comprehensive reporting and deeper, evidence-based research.

This report is entirely machine generated using Gemini 3 and may include errors and omissions. Please verify all findings. No data is used to train or tune any AI model.

For questions or suggestions, please contact kalev.leetaru5@gmail.com. To learn more or subscribe to our free daily newsletters, visit https://blog.gdeltproject.org/announcing-our-new-daily-todays-trends-on-capitol-hill-todays-media-trends-newsletter-briefings/. You can also learn more about the GDELT Project at https://blog.gdeltproject.org/ and the Internet Archive's TV News Archive at https://archive.org/details/tv.
